

PRECISION ABRASIVE WATERJET ACCESSORIES

Accessory Specifications

Material Holding Kits

Standard Features

- Each kit is customized to fit your specific OMAX JetMachining® Center
- Clamps apply pressure to hold stock in place
- Easy to adjust vertical load clamps can be positioned anywhere on tracks
- Y-axis tracks can be placed in infinite locations along the X-axis tracks
- Track components are made from anodized aluminum

Benefits

- Prevents unwanted work piece movement and scrapped parts
- No machine modifications required
- Reduces material setup time
- Expandable design can incorporate additional clamps or Y-axis tracks
- Track components are built for long life in the abrasive waterjet environment

OMAX® Material Holding Kits

Secure material in place as you accurately cut parts on your abrasive waterjet.

Designed specifically for your machine size, each Material Holding Kit includes track assemblies and vertical load clamping arms. The kit mounts into the waterjet slat bed with two X-axis tracks, two Y-axis tracks, four short vertical load clamps, and four long vertical load clamps.

About OMAX

OMAX has the industry leading patented abrasivejet controller with a built-in expert system. Our exclusive "Compute First-Move Later" motion control system automates most programming and tool setup work, virtually eliminating the need for extensive operator training. Plus, with free OMAX Intelli-MAX® Software upgrades for the life of the machine and our ongoing commitment to advance the efficiency of our technology and software, OMAX saves you time and money.

WORK SMART

The OMAX Technology Guarantee entitles you, as the original owner, to free OMAX software upgrades for the life of the machine.
